

SPRINT 3 REFLECTION - TEAM WHAT THE C#

Things we did well

- Worked well as a team
- Communication was great
- Great attendance for team meetings
- Created a Divide and Conquer Strategy
- Stuck to goals/plan we made at the beginning of the sprint
- Team was not afraid to ask each other for help
- Integrated code over the whole sprint
- Better Task Tracking
- Ran Code Metrics throughout the sprint
- Focused on the big things earlier

Things we could improve

- Start working earlier into the sprint
- More of a cram at the end
- Actually try to be done by Thursday of due date
- Spent too much time refactoring
- Need to do more documentation
- Use github more for commenting on code and code reviews
- Maybe go to office hours more for issues with code
- Not strict branches, merged many branches into each other
- Organization with branches, confused on where the most recent updates were
- Push branches to master/sprint branch instead of building off of multiple branches
