

---Readability Review---

Author of the code review: Yajat Dhawan

Date of the code review: 4/22/22

Sprint number: 5

File being reviewed: RoomGenerator.cs - extra task approved for task 5

Author of the .cs file being reviewed: Zach Richter

Specific comments on what is readable and what is not:

Very readable and clear. Every block of code is commented with appropriate comments that tells the viewer what the code is doing. Some of the commented blocks of code could be removed to make everything appear more cohesive. The difficulty and populating enemies are the easiest part to read and understand.

---Code Quality Review---

Author of the code review: Yajat Dhawan

Date of the code review: 4/22/22

Sprint number: 5

File being reviewed: CollisionResolver.cs

Author of the .cs file being reviewed: Kevin Nguyen

Specific comments on code quality:

Very explicit functionality of a function which is ideal. Doesn't require shotgun surgery when a small change is made. The task is very linear and extremely well thought out. Great code.
