SPRINT 4 REFLECTION - TEAM WHAT THE C#

Things we did well
- We communicated really well
- Helped each other on tasks when we were stuck
- Planning
- Assigning tasks
- Gave equal workload to each team member
- Helped each other debug their code

Things we could improve
- Time Management
- Too much crunch in the last week
- Merging code into a sprint branch instead of each others
- Using task board
- Code reviews earlier
- More documentation in general
