SPRINT 4 REFLECTION - TEAM WHAT THE C#

Things we did well
- New thing - Split into smaller teams of 2 for larger issues,
  - Easier to meet
  - More localized solutions
  - Multiple problems solved at once
- We communicated really well
- Helped each other on tasks when we were stuck
- Planning
- Assigning tasks
  - Everyone understood what was their task
- Gave equal workload to each team member
- Helped each other debug their code
- Did better merging code throughout the sprint(not just at the end)

Things we could improve
- Team Time Management
- Too much crunch in the last week (Again)
- Using task board
- Could have done code reviews earlier
- Could have used more documentation in general
